CHURCH NOTICES AND ACTIVITIES

CHURCH NEWS
11 A. M.
Miss Villetta Wright, who has been taking treatments from Dr. Everett, of Edmonton, returned home on Wednesday of this week. She will take her class in Sunday School on Sunday next.
The Rev. A. O. McNeil, of Jarrov will be inducted into the Jarrov-Kinsella charge at Kinsella, September 4th during Praystery Meeting.
For a practical consideration of next Sunday's lesson on "Paul in Thessalonians" we have the Theme "The Place of the Church in the Community." To what extent the influence of the modern church is felt in civic life, is one phase of the matter worthy of our best thought. Has it a place in the lives of our young people? If not wherein does the fault lie? Let's make it a personal matter and apply conditions to our own church with a view of making it a powerful influence for good in our community.
Will your excuse for not attending the Church School at 11 A. M. bear investigation?
Sunday September 9th a continued story will begin in the "Northern Messenger". The executive of the school has arranged for one copy for every home represented Sunday at 11 A. M. Every member in the home will want to read and discuss this story. Be on the lookout for it.

**NOTICE TO ADVERTISERS
AND SUBSCRIBERS**
On account of the annual convention of the Alberta Press Association, (division of Canadian Weekly Newspapers Association) being held at Lethbridge on Sep. 13-14th there will be no Irma Times issued for Friday, Sep. 14th as the publisher is going to attend. Advertisements and notices should be sent to appear in issue of September 7th.
The Calgary Power Company have an extra gang of men erecting poles for a distributing light and power around town. The gang that finished running the line to Irma have moved their camp to Wainwright.

Won Her Way

Miss Kathleen Moore, diminutive Scottish dance star, with the E. W. Beatty Cup, emblematic of the Highland dancing competition at the Vancouver Caledonian Games. Miss Moore also won a free trip to the Highland Games at Banff where she will appear in the competitions held during the festival between August 31 and September 3.

NEWS ITEMS FROM KINSELLA

Mr. D. Corbett was in Edmonton last week for a few days.
Mr. Jamieson of Edmonton, was down on Sunday to Mr. Anderson's. Mr. and Mrs. Neal and daughter, Ellen were in Wainwright last Thursday.
Mr. Hacker, of Vegreville, spent the week end at his brother-in-law's, Mr. D. Corbett. Mrs. Hacker, who has been spending the past week with her sister returned home with him Sunday evening.
Miss Bessie Scott has been spending the past week in Edmonton.
Mrs. Lund, who has been spending the past two months with her daughter, Mrs. P. J. Wangness, returned to her home in Viking last week.
Mr. and Mrs. Fred Thorson spent a day last week with Mr. and Mrs. Ross Eaton.
Miss Evelyn Corbett returned home Saturday evening from Vegreville, where she has been in training in the Hospital there for a nurse. She graduated in June.
The first frost of the season visited this section on August 22nd, damaging garden stuff and also the grain. There was still more on Friday night and heavier than the first.

JARROW

Mr. and Mrs. J. M. Orr and family returned from their trip to the coast last week. They were accompanied by Mrs. Orr's brother and wife, Mr. and Mrs. Parker of Chilliwack, B. C.

AVONGLEN NEWS.

Mr. and Mrs. E. J. Maine, Mr. and Mrs. F. L. Maine and family, Mrs. Pierce, of Millet, Mrs. M. Felling and son Leonard, of Los Angeles, California and Mr. and Mrs. O. C. Reichard and family of Stony Plain visited at the J. Allen home the past week.
Mr. O. C. Reichard had the misfortune to lose a leather suitcase containing clothing etc. somewhere between Kinsella and Irma. Any one finding same could phone R. 617, Irma for identification etc.

Miss Margaret Bennett, former teacher at Avonglen, has accepted the Junior room at Athabasca for the coming year. Miss Olive-Rush will take over the duties at Avonglen.

Paschendale Sunday School spent the day at Buffalo Park, Tuesday August 21st.

Avondale U. F. W. A. held their regular meeting at the home of Mrs. McCredie on Aug. 16th a goodly number turned out and a very pleasant P. M. was spent. The next meeting to be with Mrs. Carrington on August 30th. The one following this with Mrs. J. Marshall. Roll call to be answered "Where I first met my husband". Papers will be read by members on the "Benefits of co-operation among farmers".

Any ladies wishing to attend these meetings are always welcome.
Information has been received to the effect that the Travelling Clinic will visit Irma in October.
Miss Helen Ballentine is contemplating taking grade 12 at the Girls boarding school, Edmonton, this month. Helen was successful in passing all subjects for grade eleven, having taken a Mail Order Course for that grade at her home in Avonglen district.

LOCAL NEWS

Mr. Wesly and Miss Millie Bacon accompanied by their cousin George Bacon, of Kimmont, Ont. arrived last Saturday to join their brothers at the Clark Manor farm. Mr. David Bacon, father of the boys and girl, died last spring shortly after purchasing the Clark property and the other brothers have been looking after the crop till the rest of the family arrive from the east.

Four coal miners from the old country arrived in Irma Wednesday night to help in the harvest fields. Some of the local citizens assisted them in securing a nights lodgings and meal. Work was secured. Mr. Kieffer made an announcement on the screen Wednesday evening at the show and work was secured for them Thursday morning.

The Section men have made quite an improvement around the local depot by removing the grass and weeds and leveling up the ground. A little more work and a few flowers would make the Irma depot very much more attractive to the travelling public.

Women's Institute Held Convention at Kinsella

Children Lose 27 Per Cent of School Time Through Tardiness in Taking Places.

Kinsella, Alta., Aug. 25th—Every Institute in the Sedgewick constituency was represented at the tenth annual constituency conference of the Women's Institutes held in the Kinsella church on Monday, August 21. Mrs. Wm. N. Bates presided and 130 members and delegates and visitors attended the afternoon session. Visitors were present from towns in which there are no institutes.

Mrs. Bates reported 28 live institutes, with an ever increasing membership and the work of standing committees faithfully carried out. Referring to added responsibility brought about by the withdrawal of financial support. Mrs. Bates said: "Do you think that a force in little over thirty years has spread the spirit of neighborliness over a greater portion of the civilized world will fail us now? I for one do not or that any woman will shrink her share of the responsibility." She also urged that the women insist on such laws as "The Infectious Diseases Quarantine Law," and "The Sale of Tobacco to Children under age act," being more strictly enforced.

In reporting on education and better schools Mrs. Foster, Loughheed, brought before the conference the fact that over 27 per cent of the time schools are in operation is an actual loss as the children are not in their places to take advantage of instruction paid for, and suggested that prizes for attendance would help to correct this. Further suggestions made by Mrs. Foster were—Children should be encouraged to return to school this fall and remain until at least the high school entrance is reached; that Parent Teacher associations which are helping to overcome many problems, be formed in every community; that the school board and teacher meet occasionally to discuss school problems; that parents take an interest in the home work by helping the child to have a set time when the lessons may be prepared in quietness and thus assist the child in forming habits of obedience, loyalty, dependability and neatness; that each child be medicinally examined by doctor or nurse, particularly children of pre-school age. That defects may be remedied before the child enters school.

Mrs. Shennan, Killam, convenor for household economics, contended that home-making was the greatest profession in the world and women therefore needed special training along "home making" lines and urged the women to take advantage of all short courses, to encourage the establishing of short courses in schools and to discuss domestic problems together.

Canadian Industries Supported
The report on Canadian industries given by Mrs. Day, Galahad, was most encouraging, stating that people who never before had given the matter a thought were asking for Alberta goods.

Mrs. Vagt, Killam, convenor of public health and child welfare, spoke of the pre-school age in children as the neglected age, children of school age having become the vital centres of the effort to make health "contagious". Through vaccination, scarlet fever in schools will soon be but a tragic memory and our attention must then be focused on diphtheria, the bitterest foe of childhood, she said.

Child Welfare Stressed.
While all convenors reported splendid work from their branches, child welfare and public health and Canadianization have been stressed. Medical and dental inspection of school children, baby clinics well attended, travelling health clinics, distribution of literature dealing with infant and maternal mortality as well as diet slips and pre-natal letters, vaccinating and immunizing school children, are among the activities reported along health lines.

Mrs. H. J. Montgomery, Wetaskiwin, director for district No. 3 told of steps which had been taken in readjustment since the Alberta Institutes had been put entirely on their own.

Institute Development
Mrs. W. L. Huyck, Strome, president of Alberta Women's Institutes, spoke at "Our Institute at Home and Abroad," tracing the wonderful growth of this organization, started in Canada and now spread to the ends of

the earth, the latest organization taking place in the Punjab a very short time ago, for the purpose of receiving instruction in cooking.

The following resolution was passed: Whereas tubercular patients are being received into our general hospitals and some of our nurses in training have contracted this dread disease, thereby causing others to seek training elsewhere; therefore be it resolved that we, members of the Women's Institute of the Sedgewick constituency, in conference at Kinsella, August 20, 1928, request the government of Alberta to investigate and correct this matter.

Program Was Varied
Vocal numbers beautifully sung by Mr. Kerns, Mrs. Montgomery, Mrs. Wangness, Mrs. Seard and Miss Enid Surry of Edmonton, silver medalist of the Toronto School of Music, and readings by Mrs. Burgess, Mrs. Waite, and Mrs. Andrews, were thoroughly enjoyed by all, adding that happy touch to the entire convention. The invitation of Galahad to hold the 1929 conference there was accepted.

Mrs. Wm. H. Fleming moved a vote of thanks to the Kinsella women for their wonderful hospitality in providing the banquet for the visitors at noon and to the artists and all others who had helped to make the conference the success it was.

Those from Viking attending this convention were Mesdames H. M. Hilliker, H. J. Cartwright, H. E. Gares, Mrs. Burgess, Goodwin, Skalkitzky, Graham, Hyslop, Slavik, Adams W. Jones and Hummel. All reported having enjoyed the day.

DUCK SHOOTING SEASON OPENS ON SEPTEMBER 15

The opening date for the shooting of ducks, geese, coots and Wilson's or jack-snipe in this province south of the Clearwater and Athabasca Rivers for this season has been set for Saturday, September 15th. North of the Clearwater and Athabasca Rivers the season opens on September 1st. The closing date is December 14th.

The daily bag limit is as follows: Ducks, 30per day and not more than 200 of all kinds in the season; geese, 15; coots, 25; snipe, 25.

There is a closed season on all other migratory, none-game and insectivorous birds. There is also a closed season on this year on partridge and prairie chicken.

The open season for Hungarian partridge is from October 1st to November 30th. The bag limit is 15 per day and 75 per season.

CAMROSE LUTHERAN COLLEGE WILL OPEN OCTOBER 1

The Camrose Lutheran College will open its fall term on Monday, October 1. The building has been thoroughly renovated this summer. Maple hard wood floors have been laid. The wood work has been varnished and the whole interior re-decorated. Several thousand dollars are being spent to make the building attractive and comfortable.

The Commercial Department of the College has been re-organized and is now in a position to offer the complete three year Alberta Commercial High school course which is recognized by the Department of Education. This course includes stenographic and bookkeeping Short Courses.

The following are the members of this year's staff: C. A. Ronning, B. Sc., principal; E. N. Moe, B. A., Dean; Mrs. E. N. Moe, B. A.; E. M. Bergh, business manager.

Plans have been made for the beautifying of the College grounds and will be carried out next spring. Last year the College gave instruction to 95 students. Every thing indicates that the enrollment will be considerably increased this year. The College enters upon its eighteenth year with every prospect of continued success and a wider sphere of service.

Mr. E. L. Elford has purchased the acreage at the north end of Main Street and is taking out an excavation for a new house which he expects to have completed this fall.

Take a Ride and you will know

ONE of the most spectacular achievements in automotive history is the manner in which today's "Bigger and Better" Chevrolet is increasing its margin of leadership as the world's largest builder of automobiles.

Come, take a ride! Learn the reasons why people prefer Chevrolet.

Know Chevrolet performance! Wherever hills are steepest, the fame of the Chevrolet motor is greatest—because it is built on the valve-in-head principle, which provides all the power advantages of overhead direct firing.

Chevrolet's delightful smoothness is achieved by the use of invar-strut alloy pistons, and by the accurate balancing of reciprocating parts.

Chevrolet flashes out and away when you open the throttle because it offers the advantages of light invar-strut pistons, large valves, and carburetor equipped with an acceleration well. Come, take a ride—today!

UC-15-28-28C

CHEVROLET

IRMA MOTORS.

Irma, Alberta

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

WEEKLY REVIEW PROVINCIAL MARKETS

BEEF—Receipts were heavier at Edmonton this week, and the demand for butcher cattle appears to have eased off. Choice heavy steers made from \$9.50 @ \$9.75; choice light \$9.50 @ 10.00 good \$9.00 @ \$9.50; medium \$8 @ \$8.50 common \$7 @ \$8.
FEEDERS - STOCKERS—Feeder steers from \$7 @ \$8.50; stock steers \$6 @ \$8; stock heifers \$5 @ \$7; stock cows \$1.50 @ \$5.50.

HOGS
Edmonton reports that the price there this week thick smooths, on a fed and watered basis, is \$13.25, showing an advance of 25c. Solecets are at \$13.75.

POTATOES
Dealers are quoting \$1.00 per 100 lbs. for Alberta potatoes. Lots being offered at present. Many growers digging as they do not anticipate any better values when stocks have fully matured. Demand is holding up well. British Columbia spuds costing about \$27 per ton delivered.

HAY - GREENFEED - OATS
HAY—Receipts this week are light owing partly to farmers being busy preparing to harvest their crops; in many instances cutting has already unsettled weather were also factors relating to the scarcity of deliveries this week. Demand moderately active, but could show a considerable improvement; this will probably come next week. City prices easier. Country prices are unchanged. **FED OATS**—Good demand exists, but supplies light; bringing 40c @ 50c.

HIDES - WOOL
HIDES—Quality is fairly good, although there are still a few shippers sending in stocks not properly salted; demand drags. Prices are holding firm. **WOOL**—Trade quoting 23c @ 24c. Very little being handled for only odd lots to be picked up now.

Want Ads

FOR SALE—S. C. White Leghorn breeding stock, Cocks, Cockerels, Hens Pullets and Mated Trios. Pedigreed and general pen stock. 10 to 16 week old pullets from \$1.15 up. — Burnside Poultry Farm, Hammond, B. C.

FOR SALE—A bicycle in good order with horn and pad lock. Has been used very little. Practically new. Ross Sanders, Phone 214, Irma. 46-p.

Mr. and Mrs. C. T. Hill returned home Tuesday after spending three months in the Eastern States. Mrs. McLeaver, Mr. Hill's sister and Miss Louise Hill, a niece, accompanied them.

The Irma Women's Institute will meet at the home of Mrs. Jack Rae on Thursday September 16th. Will all the ladies please bring their recipe for the Institute cook book.

E. J. McDowell received the sad news by wire on Monday morning that his sister, Mrs. J. K. Warnock, had passed away at the Orangeville, Ont. hospital.

The Orange Pekoe is something extra—a special tea in clean, bright Aluminum

An Important Experiment

Bringing ten thousand of the vast army of unemployed British miners to assist in harvesting Western Canada's 1928 grain crops is an experiment on a large scale that will be watched with great interest and sympathy not only in Canada and Britain, but throughout the Empire. That it is an experiment confronted by many difficulties and not free from dangers is fully recognized, but in view of Canada's present need for harvest hands and Britain's serious and apparently unsolvable problem of unemployment, it is one well worth while.

Unquestionably there has arisen a feeling in the Old Land that Canada, with its sparse population and great areas of vacant lands and enormous undeveloped natural resources, ought to come to the relief of Britain and the British people through the acceptance of large numbers of the unemployed, and that in doing so this Dominion would not only render a real service to these workers and the Empire but would ultimately be well repaid through the infusion of so much British blood into the cosmopolitan citizenship of this country.

In Canada itself there are men more or less prominent in the life of the country who are critical of the immigration now coming into the Dominion and who loudly demand that settlers from the British Isles be given a preference over all others, even to the extent of excluding those of other than British birth.

Opposed to these groups is a large body of Canadian opinion which holds that it would be a mistake not only for Canada but for Britain to bring into this Dominion large numbers of the British unemployed who lack the fitness and qualifications which would enable them to make successful citizens in this new land. As the Minister of Labor recently pointed out, it would be no kindness to bring unemployed men from Britain unless there is employment for them here, and that no good service would be rendered the Empire by lessening the number of unemployed in Britain and creating an acute unemployment situation in Canada.

It is recognized, too, that in Canada employment is subject to seasonal changes, and that even under the most favorable and prosperous conditions a measure of unemployment is inevitable during the winter months. Winter employment is at low ebb in the cities and larger towns during the winter, and unless winter employment on the farms can be secured for them, British immigrants might have badly, through no fault of their own, or the fault of anybody else. Between April and November, the situation is entirely different with farm work, railway construction, building operations and municipal improvements and works of all kinds under way. December to March is the critical period.

Under the arrangement whereby these ten thousand unemployed British miners are coming to work in the harvest fields, it is provided that the Canadian authorities will do everything in their power to secure winter farm employment for them, but that all those who cannot be so placed, or prefer to return to Britain, must be returned.

For the sake of these men first and foremost, and for the sake of Canada and Britain secondly, it is to be hoped that by far the greater number will be placed in all-the-year round employment. Canada wants these Britishers, and they should be accorded a hearty welcome and every possible chance to make good. In any mass movement of population there is bound to be a number of misfits, chronic grouseurs and hopeless incompetents, but the experiment being made should not be judged by these exceptions, but by the measure of success attending the movement as a whole.

Harvest time in the West is a time of stress. It is a strenuous period; where everybody is obliged to work long hours. It is a time when the farmer, anxious to secure in safety the results of a year's labor, is apt to be impatient and exacting, and to these miners unused to long hours and engaged in unfamiliar work, the farmer may appear to be a hard taskmaster. There must be a recognition of these differences and difficulties on both sides. The harvest hand should strive to realize to the full his own experience and shortcomings in his new environment and exert himself to the utmost to give satisfaction and make good. The farmer employer, on the other hand, should exercise a maximum of patience and endeavor to teach these men and bring out the best in them in the hope and expectation of encouraging them to do their best and inducing in them a real liking for Canada and a determination to remain and make a success of life in this country.

Farmers, too, should co-operate to the fullest extent possible with the Dominion and Provincial Governments in finding winter employment for his best and make good arrangements should, if possible be made to retain him throughout the winter and until work becomes plentiful in the spring of the new year.

Judiciously handled, and with everybody striving to do his best, this experiment with British miners may well prove to be a turning point in the history of immigration to Canada. The British Government is now training an additional 21,000 miners and their families for agricultural life in the Dominions. If the coming ten thousand harvesters make a success of their undertaking, and if the Canadian people unflinchingly help them to do so, this country will undoubtedly receive the bulk of these other 21,000 partially trained men and women. Canada wants them, and our people should do everything in reason to encourage them to come here.

The present movement presents a golden opportunity, therefore, to those who have been outspoken in their criticism of past immigration efforts from Britain. It is now up to them to throw themselves with equal vigor into the task of finding permanent work for the thousands who are now or shortly will be in our midst.

Gyros To Meet At Edmonton

Northern City Chosen As Next Meeting Place Of District 8
Edmonton was chosen as the next meeting place of District 8 Gyros at the concluding session of their organization at Nelson, B.C. Robert Blair, secretary of the Edmonton club, was elected district governor and Ira McNaughton, of Lethbridge,

his lieutenant. They succeed A. Claire Arnott, of Calgary, and Lynn Fairbairn, of Lethbridge. Lynn Fairbairn was nominated for the governorship but refused to stand owing to business reasons. A resolution regarding representation at Gyro International conventions was voted out.

Activities came to an end with an excellent steamship sail on Kootenay Lake which was attended by about 160 Gyros and their ladies.

Platinum In Canada

Canada is the third largest producer of platinum among the countries of the world, Russia and Colombia, South America, holding first and second place respectively. Last year Canada produced 11,228 fine ounces of platinum valued at \$717,613.

Big Land Deal

Ten Thousand Acres Of Farming Land Purchased In Wainwright District

What is stated to be the largest land deal ever consummated in Northern Alberta was completed here when the Mid-West Development and Finance Corporation purchased 10,000 acres of choice farming land in the Wainwright District at a price of \$200,000. There are 3,000 acres under cultivation and the land is held out in twenty units which are being rented by progressive farmers.

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus Dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms, in which the jerking motion may be confined to the face or all the limbs may be affected. Frequently the patient is unable to hold anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to delirium of the nerves and relief comes through an enriched food supply. Dr. Williams' Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Green, Bath, Ont., says: "Dr. Williams' Pink Pills have been in use in my family for years and always with good results. I have saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected, and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared. He is now well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer in your locality. Send a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Travelling Clinic

Government Clinic Pays Visit To Peace River District

A Government travelling clinic has been operating in the Peace River District this season. At five population centres a total of 314 children were examined in 10 days. A total of 124 children given dental examinations, 144 extractions performed, and other dental treatment given to 123 children.

Gasoline Tax Revenue

In the first two months, May and June, in which the three-cent gasoline tax was in force in Saskatchewan, \$325,000 was collected. It was officially announced. When the gasoline tax act was passed at the last session of the Legislature, it was estimated that the revenue to the province would be, for the full year, \$700,000.

Stop the Cough—Coughing is caused by irritation in the respiratory passages and is the effort to throw lodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Canada has the most complete governmental system of wireless telegraphy of any country.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and it will not be with me out again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and I will answer all letters I get from women."—Mrs. MARY SCUTLIFE, Grainland, Sask.

MUST TAKE REST

Viscount Haldane, 72, former lord chancellor and secretary of state for war, is ill and has been ordered to take a complete rest.

For Evacuation Of Rhineland

Declaration Of Policy Adopted At Socialist Gathering

Immediate evacuation of the Rhineland by France, Belgium and England was demanded in a declaration of world policy adopted by the socialist labor international congress meeting at Brussels. Re-establishment of German sovereignty in the Saar region was also demanded. The clause covering the demands was adopted by the French delegation which joined the Germans in a demonstration for its adoption.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and hastening sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Take Up Homestead Lands

Demand Has Been Very Brisk In Northern Alberta

Demand for homestead land in the northern part of Alberta continues very brisk, judging from the records at Grand Prairie and Peace River. At this former point 289 entries were reported during the month of June, making a total of 732 for the three months period ending June 30th, and at Peace River 400 entries in June, making up a total of 1,040 for the three months.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Penner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Put up only by The T. Millers Co., Limited, Toronto, Ont.

Lean Men Better Insurance Risk

In conversation an English insurance man said that, unlike Caesar, insurance companies prefer lean men, as they consider them better "lives" than fat men. In this connection he added that men of moderate girth usually put on considerable weight if they give up smoking. His observation of this particular method of weight-building has extended over many years.

Grain Stocks Larger

The Dominion Bureau of Statistics reports the following as the stocks of grain in Canada at the close of the crop year ended July 31, 1928, as compared with the same date last year within brackets. The quantities are expressed in imperial bushels. Wheat, 76,484,052 (50,765,435); Oats, 23,712,183 (23,045,449); Barley, (1-293,777); Flax seed, 1,296,347 (2,056,106).

Laying Heavy Steel Rails

C.P.R. Replacing Rails With Heavier Steel On Maple Creek and Brooks Subdivisions

Good progress is being made with the relaying of steel on the Canadian Pacific lines in the Calgary division during the past few months. One hundred and thirty-five miles of new rail has been laid on the Maple Creek subdivision, that is between Medicine Hat and Swift Current, while the relaying is now going on in the Brooks subdivision, between Calgary and Medicine Hat.

The relaying consisted of the replacement of 80 and 83 pound steel by rails weighing 100 pounds per foot. The heavier rail is necessary in view of the increased speed of the trains and their greater weight.

As mentioned above, 135 miles of heavy rail have been laid on the Maple Creek subdivision. On the Brooks subdivision the mileage of heavy steel will be about 130. It is estimated that the cost of relaying the track is approximately \$1,000,000 per hundred miles, thus the work on the Calgary division this year will cost the Canadian Pacific Railway a total of about \$2,065,000.

Water Power Installation

Two Million Horsepower To Be Added Within Next Few Years

Two million horsepower will, it is estimated by the department of the interior, be added to the water power installation in the Dominion within the next few years. This new work will require a direct investment of at least \$200,000,000.

The annual statement of the Hon. Charles Stewart, minister of the interior, with regard to the progress of water power development issued at the beginning of the year predicted an addition of 378,000 horsepower to the total installation in the Dominion during the first six or seven months of 1928. A mid-season review of conditions now indicates that during the whole year as much as 500,000 H.P. will be added, either in new development or in addition to existing stations.

Russia Needs Capitalists

It was understood that Russia is attempting to float a \$15,000,000 loan abroad, to be used in support of the Russian railway system. Negotiations are said to be under way in Berlin, London and New York.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

When a man is satisfied with his lot he invariably plants a keep-off-the-grass sign on it.

Farm Credits

Steps To Be Taken To Put Into Operation Recent Legislation

With the return to Ottawa of Hon. J. A. Robb, minister of finance, definite steps will probably be taken to put into operation the legislation of 1927 authorizing farm credits.

The first step, it is stated, will likely be the appointment of a central board to be known as the Canadian Farm Loan Board. Under the statute, this board will be composed of four members, one of which will be the Minister of Finance.

Six provinces have passed the necessary legislation, electing to come under the scheme. These are: Quebec, Alberta, Manitoba, British Columbia, New Brunswick and Nova Scotia. Ontario, Saskatchewan, and Prince Edward Island had not as yet taken final steps in this direction.

Prior to 1825 women's shoes were made without heels.

Says No Nation On Earth Whose Position Is More Secure Than That Of This Dominion

"What we want, and what we must get, is that hearty satisfaction in co-operative work, a pride in our own possessions, and a comfort in our own allegiance, those are the bonds that are going to keep the Empire United, not only for a day and generation, but for generation after generation. The British Empire stands above everything else in the world for freedom, openness, and freedom that is not merely political freedom."

With these words, Rt. Hon. Ramsay MacDonald, leader of the British Labor Party, and former Prime Minister of Great Britain, summed up a declaration of faith in the permanence of the ties of Empire, when addressing the Canadian Club at Montreal. Mr. MacDonald expressed confidence in Canada's future and asserted that the spirit of buoyancy he had found in the Dominion was duplicated in Great Britain.

Mr. MacDonald agreed that trade preferences played a large part in building the Empire together, but said, "Trade is sometimes a fickle jade. It is too often in the market place to be reliable. We must find something more."

Here Mr. MacDonald made his declaration of his idea of the essential bond of empire unity.

He continued with a discussion of freedom. A nation following the gleam of freedom, he said, a community. A commonwealth of nations would receive the homage of all the other nations of the world. That, he said, was his ideal of the British Empire.

Mr. MacDonald's vision of Canada's future was given in the following words:

"Canada, and this is the last word I shall offer you, has a future that is secure. As the years go on your population will get bigger and bigger, your factories will become larger and larger. You will develop your transport, you will exploit your hidden riches. The places that are now desolate will become busy hives of exploited industry. Canada, 50 years from now, Canada of a century from now, what rein are you to put on your imagination when you try to picture it? My friends, there is no nation on the face of the earth whose future is more secure than yours. Wealth will pour into your laps, money will come to you in abundance. Economic power will be yours. When some of the still new countries that are your neighbors will have passed beyond the middle age and begin to show flagging zeal of years, Canada will still be young, Canada will still be buoyant."

So my friends, with this feeling in my heart, I, who have led a party just headed by a government composed mainly of men who before they came to rule had never entered public buildings except as supplicants, I who with colleagues who know what the British Empire means, not as red patches on the map, but as hours and hours, days and days, weeks and weeks, and months and months, of almost unbroken labor required to be careful of it, required to defend it, required to guard it, required to advance it, required to keep its name and reputation clean and pure, I come to you, and there is nothing in my heart except pleasure in meeting you and honor for the nation, its past, hope for its future. Nothing but those things are in my heart and that is what I have been trying, so imperfectly I am afraid, to express to you while thanking you for the honor you have done me."

German Typewriters
The German manufacturers are now invading the typewriter market in Canada. They are offering their best portable at \$42.70 net, which is equivalent to \$53.38 duty paid against the U.S. price of \$60.75 delivered in Canada.—Financial Post.

If people are very bright, it is impossible to keep them in the dark.

"Don't trust him. He is a man who will stroke your back before your face and laugh in your face behind your back."—Pete Mele, Paris.

Sweeter Than Sugar

South American Plant May Be Valuable In Modern Diet

A substance two hundred times sweeter than sugar cane has been found in the desert regions of Paraguay, in South America. Scientists are experimenting to see whether its properties may not be valuable in modern diet. The plant belongs to the family of composites, of which the sunflower and daisy are familiar representatives. The sweetness it contains is not a sugar, but a glucosid somewhat similar to that found in the root of licorice. The leaves are dried and ground up, and a pinch of them is added to anything that requires sweetening; or they may be soaked in water and a sweet liquor prepared. One of the most valuable qualities of this liquid is that it does not ferment. The possible uses of such a plant are more or less obvious. It will particularly interest sufferers from diabetes, promising to furnish them with a sweetening that has none of the harmful properties of sugar. Extensive tests will be required, of course, before it can be said that the new substance is wholesome and free from all deleterious effects. The plant has perennial roots, so that cutting the stem does not terminate its life.

Want Self-Government For India

The Associated Chambers of Commerce at Bombay, which claim to represent 1,000,000,000 pounds of British capital invested in India, have made a move in favor of self-government for India. They addressed a memorandum to the Simon commission, which is making a political survey of India, recommending that self-government should be given more than a fair trial.

Winnipeg Newspaper Union

A Modish New Frock

Charmingly graceful is this attractive one-piece frock suitable for afternoon or evening wear. In View "A" contrasting material is effectively used for the front and back, insets on the long sleeves, and the shirred tunic at each side which achieves the modish uneven hemline by extending below the edge of the skirt in front. In View "B" the frock is fashioned of one material and the sleeves are omitted. The neck and armholes are bound and a wide crushed belt fastens at the side. No. 1431 is for misses and small women, and is in sizes 16, 18, and 20 years. Size 18 (36 bust) requires 3 1/2 yards 39-inch, or 2 yards 54-inch plain material, and 2 1/2 yards 39-inch, or 1 1/2 yards 54-inch contrasting. View "B" requires 3 1/2 yards 39-inch, or 2 1/2 yards 54-inch material. Price 25 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

ADVICE TO PARENTS

Waywardness Of Children Largely Due To Lack Of Parental Discipline

General Draper, Toronto's Police Chief, is not concentrating all his efforts merely in improving the efficiency of the force itself. He realizes that the success of any police system is dependent on the co-operation of the people at large and that infinitely the best public protection is a high standard of public morals. In writing in *Carry On*, a local veterans' organ, he gives some noteworthy advice to parents.

The Chief is old-fashioned enough to believe that the Fifth Commandment means just what it says to children; and that no better formula for child-training can ever be discovered than is imparted in Proverbs 29:17, and 32:6.

"In what particular has the home failed?" the Chief asks. "I would say in relaxation of parental discipline and in the neglect of general supervision over the rising generation. The so-called emancipation of women from the bondage of the home has been followed by a corresponding emancipation of the children from the control and discipline of the parents, and is one of the most potent factors in the growth of those conditions from which youthful delinquency and crime develop. This body of conditions, this criminal matrix (if I may use such a term), is fostered, if not actually created by the indifference, the lassitude, the neglect—or whatever you might call it—the failure by parents fully to perform their duties. The consequence is that the young of today are allowed to be poisoned in heart and mind by filthy, suggestive, vicious literature, so easily obtainable and widely discussed on all hands; by moving pictures, many of which teach everything but virtue, and demonstrate in detail how the worst crimes can be committed; and by frequenting of idle, loose company in dangerous pleasure resorts. Undoubtedly society is much to blame for not suppressing such literature and pictures and resorts; but, nevertheless, the parents, being bound by their duty are primarily to blame for the condition of the young ones."

Chief Draper agrees with a noted Western Canadian, Rev. Brother Joseph, that there is too prevalent a tendency to leave growing children too much to their own devices. He urges athletic sports, on the ground that "a sound body makes a sound mind." Of far more importance than athletics, or organized training, he judges the example of elders. "Youths cannot be expected to have any respect for law and order when their elders disregard the law. Greater care must be exercised in the education of boys in church, school and at home; attention must be paid to them in their spare time; and last, but not least, examples must be set by their elders which it would reflect to a boy's credit to follow."—Toronto Globe.

Even left-handed people sometimes find it necessary to waive their rights.

"What is the greatest water power known to man?"
"Woman's tears."

How do modern girls spend money?" asks a contemporary. Easily.

VISITING CANADA

Here you have John W. Turpie, fifteen-year-old London schoolboy and member of the Westminster Troop of Boy Scouts, who worked his way to Canada and across to New Westminster, B.C., as a representative of his troop, with which the New Westminster Scouts is affiliated. Turpie took a job on a Canadian Pacific liner for his Atlantic passage.

Why Russia Imported Wheat

Late Harvest and Depleted Reserves Is Given As Reason

The fact that Soviet Russia recently has been importing wheat was admitted at Moscow by A. Mikoyan, trade commissar, in an interview with the newspaper Pravda. Mikoyan said because of the late harvest and depleted reserves, the government has been unable to supply seeds to the districts where the wheat crop was a partial failure. The government, therefore, purchased 270,000 tons abroad, of which 50 per cent, already had arrived and the balance was expected before the end of this month. Despite the necessity for importing wheat, Mikoyan said he expected the crop to exceed last year's.

Barbers Have Trouble With Watches

Why is a watch worn by a hairdresser subject to frequent breakdowns? "It is the little short bits of hair that do the damage," said my hairdresser to me the other day, writes a Daily Chronicle contributor. "The last time I sent mine to be repaired—after only six months' wear—scores of tiny bits of hair were found to have clogged the mechanism."

A combination watch and automatic lighter has appeared in London.

Canada extends over an area equal from Athens to the north pole.

HAS REMARKABLE COLLECTION

John Sutcliffe Smith, of St. Catharines, Ont., and a few of his 230 collection of ancient and modern watches of remarkable design. This collection, valued at \$25,000, is to be presented to the Royal Ontario Museum. Shown with Mr. Smith is a watch with seven dials, giving the time in as many cities; one with chimes composed of angels striking three bells; a single-handed watch in which the hour changes in a little opening at the top, and others of unusual workmanship, design and value.

Explorations Reveal Character And Resources Of The Great Northern Plains Of Canada

Maps Must Be Accurate

Map Making Is An Art That Requires Great Exactitude

The lithographing of maps is a craft requiring great exactitude, and lithographers have many troubles. Not the least of these is with paper that shrinks or expands though ever so slightly under varying weather conditions.

In Britain's African colony of Gold Coast all color printing for maps has to cease during January when the harmattan blows. The dry wind following rapidly in humid conditions causes a change in the paper of as much as a quarter of an inch in a sheet two feet square. This makes it impossible to secure registration of the colors in their precise places on the maps. Map-making in Canada is subject to the same difficulties, but in a lesser degree.

Paper used in map-making is of a superior kind specially made for the purpose. Most of the papers used for general purposes are too porous and too susceptible to damp for high class map work. Even when plaster of Paris and other fillers are used on them they are still subject to such great changes in dimensions as to be of little use for lithographing maps.

Alberta Macaroni

Lethbridge-Made Product Is Shipped To New Zealand

Macaroni from the Columbia Macaroni Factory, of Lethbridge, is going to invade the New Zealand market. A car of Lethbridge-made macaroni left recently for New Zealand, the order being placed as the result of samples sent by the local company last January. The report from the New Zealand dealers was that the local macaroni was "second to none." There is now no duty on Canadian macaroni entering New Zealand, and a profitable market there is anticipated. An effort is now to be made to enter the Australian market, Mr. Rader, head of the Columbia Macaroni Factory, has received from Italy and installed the largest and most up-to-date macaroni press in America, which will enable him to double the capacity of his North Lethbridge plant.

Good Work Of Reclamation Service

Heavy Gumbo Land In Alberta and Saskatchewan To Be Cultivated

As a result of experiments of between five and six years' duration conducted by the Calgary Branch of the Water Power and Reclamation Service of the Department of the Interior, between 5,000 and 6,000 acres of heavy gumbo land known as the Maple Creek flats in Alberta and Saskatchewan, will soon come under production for the growth of alfalfa. By irrigating a couple of town lots and experimenting with forage crops, it was proved that alfalfa and sweet clover can be grown on these flats with great success. It is possible some irrigation project to serve the whole lands will be developed.

Rust Resistant Wheat

Encouraging Results Are Obtained In Making Experiments This Year

"We are holding our breath," remarked L. N. Newman, Dominion cerealist, who is in the West, the expectation referring to the development of a grade of wheat that will be rust resistant. Mr. Newman is looking into the situation of "Reward" wheat, which is not rust proof but grows so quickly as to be matured before the rust season develops with the humid weather. This year "Reward" has been sown on 400 acres of experimental farms, while 467 farmers are growing it from limited samples distributed among them. The result so far is stated to be most encouraging.

Raise Pheasants In Alberta

The Medicine Hat Fish and Game Association have been experimenting with the raising of pheasants by supplying different people with the eggs. The Association now possess 22 young birds and, in addition, will shortly have 20 grown pheasants shipped to them from Oregon.

Traffic Cop: "Hey, who do you think you are?"

Driver: "Oh, I'm just one of the taxpayers that pays you your salary for insulting me!"

Your efforts to please others invariably afford you pleasure.

As exploration and surveying reveal the character and resources of the great northern plains of Canada, former misconceptions of these great areas are disappearing. For many years, in fact for almost a century, nearly one-sixth of the area of the Dominion was branded "Barren Lands" and until recent years very little was done to reconsider the possibilities of these regions in the light of present-day conditions. However in addition to carrying on their regular work, surveyors and explorers of the Topographical Survey of the Department of the Interior, have been gradually penetrating into the Great Northern Plains. With the advantage of modern instruments and the benefit of scientific and technical training, these officers of the department are enabled to make more accurate surveys of the country than was possible by early explorers.

How one of the first explorers of Canada's Middle West came to apply the name "Barren Grounds" to what has proved to be one of the most fertile areas in the world is given in the account of Henry Kelsey's explorations in the last quarter of the seventeenth century. One of Kelsey's longest expeditions was made between 1690 and 1692 when he travelled from Port Nelson, on Hudson's Bay, by way of the Hayes and Saskatchewan Rivers. He journeyed in the company of a wandering band of Assiniboines, into the heart of the western prairies. His diary affords interesting reading today, particularly the entry for August 23, 1691, which reads as follows:

"This instant ye Indians going on hunting killed great store of Buffalo. Now ye manner of their hunting of these Beasts on ye barren ground is when they see a great parcel of them together, they surround them with men, which done, they frame themselves into a smaller Compass keeping ye Beasts still in ye middle and so shooting ym till they break out at some place or other and so gett away from ym."

Of the country itself, Kelsey states: "This plain affords nothing but short round sticky grass and Buffalo and a great sort of Bear which is bigger than any white Bear, and is neither white nor black but silver haired like our English rabbit. Ye buffalo likewise is not like those to ye Northward, their horns growing like an English ox but black and sharp."

Kelsey's interest in the region was from the point of view of the fur trader and its possibilities from an agricultural standpoint apparently never occurred to him. The country where he hunted the buffalo and the grizzlies now contributes hundreds of millions of bushels of grain annually and the short round sticky grass supports great herds of cattle.

A thousand miles north of the territory traversed by Kelsey, beyond the forested lands of the Canadian West and extending to the Arctic ocean and Hudson's Bay, are the Great Northern Plains to which Kelsey's epithet has been mistakenly transferred. Today's picture, given by recent explorers, is one of gently undulating country with lichens and mosses on the hills and shrubs, flowers and grasses flourishing in the valleys. It is true no trees grow north of the timber line and that there are certain areas lacking in vegetation, but the greater part of the region is so far from being barren that it actually supports at the present time in addition to the fur-bearers and musk-oxen, hundreds of thousands of caribou.

The public at large is but an elevator used to hoist the chosen few to prominence.

"We must have a sale tomorrow. Put up all the prices 25 per cent. today so that we can make a genuine 25 per cent. reduction tomorrow."

Sondagsnisse-Strix, Stockholm.

New POWER New BEAUTY in General Motors' Lowest Priced Six

PROVIDING even finer performance, revealing even smarter style and built by General Motors under manufacturing processes unsurpassed for precision and accuracy . . . today's Pontiac Six represents a value the like of which has not been known since the beginning of Pontiac history.

To the sound basic design which has made Pontiac Six internationally famous for stamina and long life—to those important advancements, such as the G-M-R cylinder head . . . Pontiac has added improvements leading to *even greater power and to smoother performance.*

To the inherent style and beauty of Fisher bodies—to the effective symmetry of sweeping fenders and high, straight hoods—Pontiac has added the freshness of new Duco colors and the modish air of smaller, smarter wheels and oversize tires.

This lowest priced six of General Motors has won its sensational success by always reflecting General Motors' ability to build a better car for the money. Now it offers *new power and beauty.* See it and drive it today.

FORD CATCHING UP

Ford Motor Company of Canada Limited, is enjoying the greatest period of production activity in the history of the Company, having reached and exceeded peak production with a total of more than 500 motors a day. W. R. Campbell, vice-president and treasurer, made public this announcement and at the same time disclosed the fact that more than 10,000 are on the payroll of the Company in Canada. "The public demand for the new car is such that it will be necessary for us to maintain the greatest production schedule in the history of the Company," said Mr. Campbell. "More than 8,000 men are engaged in the manufacturing units of the plant at Ford City, and another 1500 men are producing cars in assembly plants at Toronto, Montreal and Winnipeg. "In spite of the fact that about 400 cars a day are being delivered to purchasers in Canada, there is always a list of orders on file." It was explained that for every car delivered there is a new order received, which keeps the order list at a sustained level.

Continuing the interview, it was stated that the market for the new car in Canada and the British Overseas Dominions was better than at any previous time. During the winter months in Canada the demand for motor cars is somewhat retarded, but in overseas territories this demand increases. This balanced and sustained demand will make it necessary for the Ford Motor Company of Canada to maintain its present production schedule throughout the year.

Production on the new standard coupe is announced, and in this model there incorporated all the refinements of the new Fordor with the dash and fleetness of the roadster. It will be on display at the Canadian National Exhibition, and it is expected to create its own place in the market for the individual car. It is expected to serve as the ideal model to round out the motoring freedom of the family requiring the second car.

In concluding his announcement, Mr. Campbell referred to the healthy business conditions prevailing in Canada. "There is no doubt but that Canada is getting into its stride of commercial, industrial and mineral development. Good crop prospects, reduction of the National Debt, air mail expansion and aviation activity, completion of the Hudson Bay line and sure and steady mineral production, all point to a greater era of progress than ever before. In our organization, as an example, we are buying more material, paying out more wages and selling more cars than ever before. That it will continue is more apparent each day."

CANCER

With the knowledge we now possess, the cure of cancer is only possible when the disease is recognized early and proper treatment started at once.

One of the reasons for advising that every person should go to his family physician once a year for a Health Examination is to provide for the discovery of disease in its early stages, and so permit of treatment at a time when it offers the best chance of cure. Otherwise, it is left to the untrained lay person to decide for himself that he is in need of medical care.

For the particular benefit of this latter group, it is necessary to point out the conditions which, if they occur, should be considered as danger signals, and should turn these persons in the direction of their family physician without delay. Everyone who experiences one of the danger signals is not developing cancer, but it requires medical skill to decide whether or not the symptoms which are present mean cancer.

In its early stages cancer is a local condition, and, if it is completely removed, there will be no recurrence. If it is not removed, it spreads to other parts of the body and may cause cancer in these other parts. This is the simple explanation of the need for proper early treatment.

Any lump particularly in the female breast, any abnormal discharge, any sore that does not readily heal, any wart or mole that changes in size or appearance are danger signals.

Pain may not occur in the early stages. The person who thinks that the condition cannot be serious because there is no pain is mistaken, and, as a result he may allow the time for cure to slip past.

Medical and surgical knowledge, experience and skill are at the service of the public, but they must wait until the public decides to call upon them.

The constant drop of water
Wears away the hardest stone,
The constant gnaw of the Towner,
Masticates the toughest bone.
The constant cooling lover,

VIKING

The Minburn dramatic club presented
the comedy-drama "A Poor Married
Man" in the Recreation hall last Thurs-
day evening to a large and appreciative
audience, under the auspices of the
Viking Elks. The play was thoroughly
enjoyed by everyone and the Minburn
players kept up the high standard set
by other similar organizations that
have appeared here the past few mon-
ths.

The play was full of comedy. The
story centered around a college profes-
sor who had married a charming
young lady whose mother insisted on
accompanying the pair to their new
home, much to the disgust of the
groom. His friends mistake the moth-
er for the bride and relate to the profes-
sor stories of the mother's hus-
bands and her daughter. The profes-
sor naturally thinks they are referring
to his wife instead of her mother. A
college boy falls in love with the
professor's wife and complicates
matters. The professor believes he is
going to be poisoned by eating lobster
salad, and when his wife says she is
going to run away with the college
boy he is glad of it. She marries a-
gain and so does the professor who
thinks he is now rid of mother-in-laws,
but his second wife's father brings
home a bride who turns out to be
none other than his former mother-in-
law. However things are finally strai-
ghtened out and all ends happily
and marriage is pronounced a real
success.

The members of the cast were: Mrs.
Wm. Park, Mr. Roy Park, Mrs. Jas.
Hoskins, Mrs. E. Bruce, Mr. and Mrs.
V. Bentley, Mr. Rath, Chas. Hughes, &
Socrates, the dog. The entire cast
were excellent in their various roles.

F. Larcombe and J. Hardman fur-
nished musical numbers between acts.
The damage to the crops by the
frost is estimated to be from 15 to 25
percent. Some parts of the district
suffered more than others as reports
would indicate. However the extent of
the damage will not be known until
the crop is threshed and graded.

Dr. Little was in Edmonton on Mon-
day assisting Dr. McBeth during the
serious operation on Mr. Geo. Barker,
of Bruce. We understand that Mr.
Barker is doing as well as can be
expected.

The Viking schools will open for
the fall term on Tuesday, September
4th and the hurrying of pupils with
books under their arms will again be
a familiar scene.

The school staff this year will con-
sist of Mr. Wm. P. Wagner, B. A.,
of Provost, as principal; Miss Mary
A. Grant of Minburn, assistant
principal; grades 7 and 8, Miss Irene
Grant, of Minburn; grades 4, 5, 6 Miss
Anna Hall; Mrs. S. Clark, primary
grades.

The school house has been put in
good order and everything points to a
good year.

Messrs. L. H. Peterson, Wm. Pet-
erson, and Luther Hultgren, of Wood-
hull Illinois, are in this district look-
ing after farming interests. They mo-
tored up from Illinois. The corn crop
in Illinois is the best ever and a bumper
yield is expected. They are well
pleased with conditions in Alberta.

The Women's Institute held a very
successful baby clinic in the Church
Hall, Wednesday, August 22nd. Twenty-
three babies were examined by
Miss Emerson and Miss Davidson the
nurses in charge. Dr. Saunders assisted
during the afternoon and Dr. Little
called but was unable to remain.

The committee in charge served
refreshments to the mothers.
The ladies of the fancy work table
of the United Church ladies auxiliary
met at the home of Mrs. W. H. Collier
Tuesday evening in honor of Miss Gil-
bert, one of their members, who is
leaving next week to teach at Edger-
ton. Mrs. H. M. Hilliker in making
the presentation of an ivory clothes
brush to Miss Gilbert from the mem-
bers recalled how she had taken an ac-
tive part not only in the Auxiliary
work but in many other organizations
and movements and that she would
be greatly missed in the community.
Miss Gilbert made a suitable reply in
which she expressed regrets at leav-
ing and thanked the ladies for their re-
membrance.

Alymer. — Mrs. Christina Dodds
passed away on Wednesday morning
at her late residence in Alymer, in her
sixty-ninth year, after a lengthy ill-
ness of three years. Born in Lake-
view, she had lived in Alymer for the
past twenty-eight years. Her hus-
band, the late Edward Dodds, prede-
ceased her twenty-nine years ago.
Mrs. Dodds was a member of the United
church, and beloved of all who
knew her. She leaves to mourn one
son, John Leslie, of Viking, Alberta;
one daughter, Mrs. W. T. Winder, of
Tampa, Florida, and two brothers,
Kenneth and Donald McLennan, of
Alymer, and one sister, Mrs. Margaret
Ferguson, of South Denbigh. The
funeral was held on Saturday, August
25th, at Alymer.

Mr. and Mrs. Hedley Warner, of
Mayerthorpe, were visitors last week
at the home of Mr. and Mrs. M.
Chedour.

WORLD HAPPENINGS
BRIEFLY TOLD

Increasing alarm is being expressed over the unemployment situation in Great Britain, with 1,300,000 men out of work.

Two new brands of whisky, approved by the Ontario Liquor Control Board, have been put on the market by the commission. The varieties are styled "Commission No. 1," and "Commission No. 2," and bear the seal of the board's approval on the bottles.

The Paul, chief chemical analyst for the Bureau Generale, the French Scotland Yard, is reported to have detected "toxic matter in the viscera of Captain Alfred Loevenstein, Belgian financier, who died recently was surrounded by mystery."

Four men held up the First National Bank of Boston, N.D., and escaped with between \$3,500 and \$4,000. They made their getaway in a dark blue Buick sedan heading east out of Boston, which is about 65 miles north of Fargo.

Baron Von Hupfeld, owner of the trans-Atlantic monoplane, the Bremen, which Captain Hermann Kuhl and Col. James Fitzmaurice piloted across the Atlantic, will make a presentation of the disabled plane to the projected municipal museum of New York.

Investigation of the immediate power requirements of the city of Saskatoon is to be made by a committee of the Saskatchewan Government, with a view to working out a plan under which a start can be made in the production and sale of power under central control.

Owing to inadequate steamship accommodation, it will be impossible to transport to Canada full quota of 10,000 unemployed which were to work in the Western harvest fields, according to J. Bruce Walker, director of European immigration for Canada. He states that possibly not more than 8,500 would be taken to Canada from all sources.

Lost Prospector Found

After Walking Aimlessly For 48 Days, Is Rescued By Plane

Lost forty-eight days, during which time he wandered aimlessly through the dense wooded country north of The Pass, Andrew Taylor, local prospector, was found by searchers near Burntwood Lake, and brought by aeroplane to The Pass.

It was a harrowing story that Taylor related to his rescuers. For days he walked through the woods in the belief that he was on his way to settlement, only to find that he was hopelessly lost.

Faced with starvation, he had killed frogs and eaten them, and at times when driven to desperation had relieved his hunger by consuming the dead fish found on the surface of the river.

Later, he found a few half-formed wild raspberries and, stung by an Indian. It was the uprooted tubers seen by a wandering native that gave the first authentic clue to his whereabouts.

He must have travelled 500 miles in a huge circle to reach Burntwood Lake.

The condition of the man when found by Fred Coleman, veteran prospector of Cobalt, Ont., and Capt. Kenyon, who piloted the Fokker search plane, betrayed which he had hardship and suffering which he endured during his wanderings. His clothing was in tatters from pressing through dense underbrush, while bits of rags were bound around his feet for protection against the rough footing.

Seven weeks' growth of beard covered his face, while his haggard countenance showed that he could not have survived much longer if aid had not reached him. Barely able to walk, he nevertheless showed his joy in having been returned to his wife and friends who had long since given him up for dead.

"Your nose is red. Are you cold?"
"No, thirsty." - Pele Mele, Paris.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

We were now in the home of the Clydesdales, and a call by Mr. West from Newcastle, in the morning had brought a pressing invitation from Messrs. A. & N. Templeton of Sandy Knowe, near Edin, to visit them. This took a section of our party to see the great horse "Benefactor" and some of his progeny as well as the Border Leicester flock of Messrs. Templeton and here we had our first taste of Scottish hospitality. The brothers with their sisters and mother entertained us royally to a delightful tea and the "wee drizzle" was not missing. Ours was great privilege because the afternoon was lovely and from the high ground at Sandy Knowe the eye can roam for twenty to thirty miles in every direction over the beautiful Scottish countryside. Our visit over we continued our journey to Edinburgh leaving the night with old familiar songs.

The "main body" had gone on, passing through Dalkeith at dusk, awaiting the morning for one of the members of our party, Mr. James Walker, representing the Canadian Exhibition, who, who was born in this pleasant Scottish town. Evening found us in Edinburgh, comfortable, established in the North British Hotel, overlooking the famous Princes Street.

From Melrose we had sent a challenge to meet the best ending link in the chain, the "Bramstone Agan" and "Bramstone Phyllis," both of which, along with a number of fine cattle, were shown for our benefit. To our astonishment at these animals, including the great stallion, were put through their paces by Mr. Park's twin daughters, six of seventeen, whose competent horsemanship delighted us, as did their fine cattle, were shown for our benefit. To our astonishment at these animals, including the great stallion, were put through their paces by Mr. Park's twin daughters, six of seventeen, whose competent horsemanship delighted us, as did their fine cattle, were shown for our benefit.

Our first engagement was to visit the Clydesdale Stud at Portobello, of Mr. Robert Park, owner among other notable stock of "Bramstone Agan" and "Bramstone Phyllis," both of which, along with a number of fine cattle, were shown for our benefit. To our astonishment at these animals, including the great stallion, were put through their paces by Mr. Park's twin daughters, six of seventeen, whose competent horsemanship delighted us, as did their fine cattle, were shown for our benefit.

Mr. Park took us into his home, "Bramstone House," where his daughters entertained us to high tea in the room where the final committee meeting was held to have been held when the Union of Scotland and England was decided in 1707. The vision is eight-sided and contains a view of the Union of Scotland and England was decided in 1707. The vision is eight-sided and contains a view of the Union of Scotland and England was decided in 1707. The vision is eight-sided and contains a view of the Union of Scotland and England was decided in 1707.

A trip to the famous Forth Bridge, reminding us so much of our own Quebec Bridge, completed our first day in Edinburgh.

Leaving for Stirling at 8 a.m. en route for Perth, we were treated to a taste of Highland weather, for snow began to fall by the time we reached Stirling Castle. This forbidding stronghold, perched high on a dominating rock overlooking the plain beneath, is interesting at any time, but seen through a Scottish mist and under a snow, it was doubly fascinating, notwithstanding that we were robbed of the view of the field of Bannockburn. Taken and released, this grey building, calm enough today, has witnessed many sieges. Within its walls were born James II, IV and V of Scotland, and here were crowned James V, Mary and James VI, of Scotland, afterwards First of England.

We walked the courts and trod the battlements. We examined with some wonder the window of the Douglas Room where the rebellion Earl was stabbed to death by James II, in 1452. We left with the influence of these merely stirring things still upon us, to view in front of the castle the noble statue of Robert the Bruce, where, his voice thrilling with pride, a small boy with his sister told us of Scotland's glorious days, excellent in this guide to the Castle itself.

Next we came to the wonderful Wallace Monument, a great granite tower, four square, 220 feet in height and standing 520 feet above the level of the Forth. In a niche on the west corner stands a bronze statue of Wallace, measuring 15 feet from heel to helmet, to the tip of the sword 21 feet, and raised 50 feet above the doorway—a noble figure sword on high, summoning his followers. Those of us who climbed the inside spiral staircase of 245 steps were amply recompensed. The inner chambers are noted among other things for a wonderful echo and in one of them, the Hall of Heroes, lies the double-edged sword of Wallace, 4 feet 4 inches long in the blade which narrows from 2 1/2 inches to 1 inch. The leather mounted hilt is 12 inches long and has a two-inch pommel. For six centuries Wallace's sword lay in Dunbarton Castle, being transferred to the Monument by Hugh R. Wallace, of Glencairn Castle, his lineal descendant.

Soon still falling, we arrived in Perth, the pretty, ancient city by the Tay. Perth is not a big city but its charm is instant. Moreover, its fame as a livestock centre is world wide. For many years it has been the most important centre in Britain for the selling by public auction of pedigree Shorthorn and Aberdeen-Angus cattle and our arrival coincided with the biggest sale of the year.

Following lunch and a warm welcome by Lord Provost Dempster, we were soon watching with critical eyes the judging and select pairs of cattle, noting with admiration the high average of quality prior to taking

RULING INDIAN PRINCES

Conferences are now in progress between representatives of the ruling Indian princes and of the secretary of state for India. At present only about half of India is under direct British rule, while the rest is made up of a hundred so-called independent

our places next day in the auction room. Accommodation in Perth was so taxed by the sale that nearly half our party had to spend the night in Dundee, an opportunity of seeing the city which was appreciated.

Back in Perth we had the pleasure of hearing Mr. Lovat Fraser, the greatest livestock auctioneer in Great Britain; Mr. Fraser frequently sells pedigree stock at 50 animals per hour for several hours at a stretch. He did not believe in fame, for animal after animal was sold during the half day that was available to us. The lesson of the sale, so far as we Canadian farmers were concerned, was the excellent quality of stock that was sold at distinctly reasonable prices.

The sensation of the sale was the fetching of 3,500 guineas by Captain John MacGillivray's Supreme Champion, "Calrossie Double Event" which was bought by Mr. James Fidey, the well-known exporter to the Argentine.

(To Be Continued.)

Dissect Brain Of Lenin

Embodiments Analyzing the Gray Matter Of Brain Of Apostle Of Communism

A Toronto Mail and Empire special from Paris says:

"The brain of the late Nicol Lenin, the Bolshevik dictator, has been cut up into 31,000 slices and particles. For two and a half years the entire scientific staff of the Lenin Institute, at Moscow, under the direction of the famous German savant, Professor Otto Vogt, has been busy with the task of dissecting, analyzing and preserving the gray matter of the apostle of Communism."

"In the case of the body of the dead leader a secret method of embalming was evolved that is now recognized to insure the perfect preservation of the mummy for several centuries."

Louis Tracy Is Dead

Well Known Author Of Popular Stories Passes Away At His Home In Kent

Louis Tracy, author of many novels and detective stories, died recently at his home near Ashford, Kent. He was born in 1863, and educated privately in Yorkshire and France. In early life he varied his journalistic career with travel.

He was attached to the headquarters staff of the British war mission in the United States in 1917. In 1921 he collected a large sum for the restoration of Westminster Abbey.

A bank failure may not upset the depositor, but it will cause him to lose his balance.

After it is too late a man thinks of a lot of bright things he might have said.

RESCUES TRANS-ATLANTIC FLYERS

Buffed about by waves in their fragile seaplane in mid-Atlantic, Capt. Frank T. Courtney, E. B. Hosmer, of Montreal, son of a former Dominion-wide financier, his financial backer, Fred Price, mechanic, and E. W. Gilmour, of Glasgow, wireless operator were rescued by the Atlantic Transport liner Minnewaska a few days ago. Capt. Courtney and the other three were attempting a flight from the Azores to Newfoundland, when their machine fell in flames into the sea. By the aid of their small radio set the Minnewaska found them after she left her course to go to their aid. The Minnewaska reached New York on August 6 with the rescued flyers. Photograph shows the Minnewaska and inset left, Capt. Courtney; inset right, E. B. Hosmer—Photos by White Star Line.

NEW YORK BANKER HEADS EXPEDITION

Mapping Unexplored Hunting Region In Canadian Rocky Mountains

A trip which has been prompted by a motive of generosity of one big game hunter to his fellow sportsmen, is now being undertaken in the Rocky Mountains of Canada by Prentiss N. Gray, president of the J. Henry Schrader Banking Corporation, New York City. The trip, which will take him through what is unmapped and almost unknown country between the Peace River area and McBride, B.C., will occupy more than a month and Mr. Gray is now en route over Canadian National Railways to Grande Prairie, Alberta, to start his expedition.

The entire cost of the expedition is being borne by Mr. Gray, who is taking with him a surveyor and two assistants, a large company of guides and pack horses and a complete motion picture outfit for the purpose of filming wild life and scenery. The purpose, explained by Mr. Gray, in a letter to S. J. Hungerford, vice-president of the Canadian National Railways, is to secure an accurate map of this territory, which he believes to be a splendid game hunting field, and to make accessible to sportsmen a new hunting area which can be reached within a reasonable time. The idea occurred to Mr. Gray last Fall, during a hunting trip which he made into the northern section of this area and out of which he secured some fine specimens of moose, mountain goat, marten, sheep, and grizzly bear.

In his letter to Mr. Hungerford, Mr. Gray said: "We found a new country—that is, new to the sportsman, and I believe new also to the trapper and Indian. So far I can find no maps that even attempt to show the streams of the area as anything more than dotted lines, and most of these are incorrect."

"We reached our railroad in 4 1/2 days from the centre of this new area, although it took us 17 days to get in. This will appeal to a lot of men who now believe they must spend 20 days on the trail getting to and from their hunting camp and consequently prefer Alaska or the Caucasus. My idea is to cut a trail into this country next August; take with me a surveyor and assistants; map the outstanding features of the country and take moving pictures of the game, which is more plentiful than any place which I have previously visited in the Canadian Rockies."

A flood of tears indicates troubled waters.

Was Eminent Western Counsel

C. C. McCaul, R.C., Prominent Lawyer, Dies At His Home In Edmonton

Long prominent as one of Western Canada's most brilliant lawyers and a pioneer of forty-five years' standing, C. C. McCaul, K.C., aged 70, died at his home in Edmonton, recently, after a lingering illness.

Legal and business circles were shocked upon learning of the death of the eminent counsel, one who had taken a leading part in some of the most important cases heard in the Dominion. Known and held in high regard in the prairie provinces, in British Columbia and in the far away Yukon, where he was one of the hardy pioneers who went through the gold rush, C. C. McCaul had a wide circle of friends and acquaintances.

From 1883 to 1888, Mr. McCaul practiced law at Fort Macleod and then he removed to Lethbridge, where he established a law partnership with F. W. H. Haultain, who had opened a law office in Macleod in 1881, and later became chief justice of the Northwest Territories.

"Man wanted for gardening," also to take charge of a cow who can sing in the choir and blow the organ."

The total number of radio fans throughout the world is stated to be ninety millions.

Premier Presented With Cottage

Cottage In Saskatchewan's New National Park Is Given To Prime Minister

Not the least interesting of the ceremonies attendant on the opening of the National Park in the northern part of Saskatchewan, was the presentation to Premier King of a magnificent log cottage, situated on the south side of the lake opposite King's Island and commanding a magnificent view of the lake. The presentation was made by Jas. Sanderson, an old timer of Prince Albert and district, in the presence of a large and distinguished gathering.

Premier King, in accepting the gift, indicated that it would be his intention to hold the cabin in trust so that those who might come after him "might have a pleasant remembrance of the great hospitality of the north country, the kindness and thoughtfulness of those who joined with Premier Albert in preparing the cottage."

The cottage is unique in that seven places contributed to its completion. Premier Albert provided the logs and erected the cottage. Regina equipped the living room, Saskatoon equipped the verandah, Humboldt was responsible for one of the bedrooms and Vonda for the second. Melfort provided the kitchen equipment (up-to-date in every way), and Moose Jaw provided the dining-room equipment.

Recipes For This Week

(By Betty Barclay)

HOW TO MAKE COTTAGE CHEESE

Use freshly coagulated or clabbered milk. Skim off cream. Set pan of clabbered milk in hot water and heat slowly until curd separates from whey. Be careful not to let milk become too hot or curd will be tough. Place in a strainer a piece of cheese-cloth rinsed in hot water. Strain heated curd mixture until well drained.

Crush curd in a bowl with a fork. Mixing with a wooden potato masher will break up lumps and give cheese a finer texture. Season to taste with sweet or sour cream, butter, salt and pepper. Finely chopped onion, parsley, water cross, celery, pimento or green pepper may be added.

RASPBERRY JUNKET WITH FRESH BERRIES

1 package raspberry junket powder.
1 pint milk.
Raspberries.
Powdered sugar.

Make junket according to the directions given on the package. When ready to serve, dust berries with powdered sugar and fill up the glasses. Whipped cream may top the berries.

Fruit and berries like oranges, pineapple and strawberries should not be put into the milk when making junket, as the fruit causes it to whey. These fruits should be crushed, sweetened and placed on top as the dessert is served. Blackberries or raspberries may be put into the dessert, also canned or preserved berries, peaches or other fruits.

Goes To Experimental Farm

J. G. Davidson, Of Saskatchewan University Receives Appointment

Announcement is made of the appointment of J. G. Davidson, B.S.A. (Saskatchewan University), M.S.A. (McGill University), to the position of assistant superintendent of the Dominion Experimental Farm at Indian Head, filling the vacancy created with the advancement of G. D. Matthews to the superintendency at the Scott farm.

Mr. Davidson comes from Kelvington, Sask., where he farms when not engaged in his university studies. He is a married man and will move his family there shortly.

"If I were rich I would never put a brush to canvas again."
"I wish I had money and you should then have as much as you wanted." - Soudage-nisse-Strix, Stockholm.

THERE is nothing that has ever taken Aspirin's place as an antidote for pain. It is safe, or physicians wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word *genuine* printed in red:

Aspirin is the trade mark registered in Canada. It is well known that Aspirin means Bayer manufacture, so when the public sees Aspirin stamped with their "Bayer Cross" trade mark.

Copyright, Canada, 1925

CHAPTER XXX.—Continued

"Here are Helmi's letters," at length said Warner; "they belong to you now. They will tell you everything. If we both get over I will take them back, after you have read them. I think I had had a wife like Helmi I would not have doubted her. I don't think I would. However I am not saying that to hurt you—no one knows what he would. Anyway I am glad I met you, Jack, and your wife is well and so is little Lili."

"And so you see you must get through. I may, but you must, and if you do you will tell Helmi. Come—our chance is just as good now as it ever will be."

Jack took his hand and pressed it. "Arthur, I can't tell you what I want to say—you have been a better friend to Helmi than I have."

The bridge was a fine iron one, with heavily studded pillars. Every second light was burning. The road leading to it was not much travelled, and as they walked up the long approach their feet made a strange echoing sound. They had left their blue overcoats open, showing the gray German smocks. Jack knew what he was to say in German if accosted, but his hope was that no one was on the bridge. Every step brought them nearer, and the lights ahead of them on the Holland side twinkled like the lights at home.

Jack's heart was in a strange turmoil over what he had heard. On, on—they were half-way over now. Steps echoing, echoing no sound but the gentle murmuring from the other side, gentle sounds . . . dogs barking . . . cow-bells . . . they must hurry . . . on . . . ten feet from the end now! Suddenly from behind the last pillar stepped out a German guard, who thrust a flashlight in their faces, blinding them with its sudden gleam. At the end of his rifle a bayonet gleamed in the light.

"Halt!" he cried.

"Why do you halt us? We are honest men," said Arthur quietly.

"Give me your passports, then," said the guard, putting away his flashlight, but not lowering his rifle. Pretending to search his pockets Arthur moved a little, then like a tiger he sprang on the guard, grasping him around the neck.

"I'll hold him, Jack!" he shouted. "Beat it! you're safe! Beat it!"

Jack found refuge in the trees on the other bank. There was a queer singing in his head, something droning like a swarm of bees. Then came a sudden pain in his shoulder like a

knife thrust, and looking down, he saw the blood running off his fingers. But he must see what happened. He crawled to the edge of the trees and looked back. Three guards were standing together, talking excitedly. He could see nothing of Arthur, but the smoke of rifles still hung around the pillars of the bridge. He crawled back into the trees and lay on the damp leaves, sobbing like a child. He was free; he was safe; but the loss of his friend was heavy on his heart.

CHAPTER XXXI.

It was a hot night in London in the early spring. The lights shone ghostly blue through their painted globes, and across the starless night search-lights stretched their spectral fingers, crossing, passing, converging, crossing again. Through the streets, in spite of the sombre gloom and the dangers of the night, an endless stream of people drifted, making a brave show of unconcern. The theatres were crowded, the dance halls echoed with rhythmic feet, and tinkled with laughter, and a touch of fear, and a sense of loss walked with every soul in London, the sound of their ominous footfalls were drowned by laughter and singing, true to the brave old British tradition.

At Victoria Station the V.A.D.'s were assembled with their waiting stretchers, for a hospital train was coming in. There were the usual noises of a great station—hoisting of signs, blowing of horns, calling of railway officials—all the sounds multiplied by the vaulted station roof. There was the usual variegated and cosmopolitan crowd, though the dominant note was the khaki of the thickest, calm-faced Englishman; here the slim Canadian, independent and alert, actually looking for some one, and not ashamed of appearing anxious; there the blue-uniformed French officer, darting through the crowd like a gorgeous bluebird.

They are removing men on stretchers now, and the V.A.D.'s are busy. Very skillfully they manage to roll the bedcases to the stretchers and carry them to the waiting ambulances. The pallid faces, all of them, some handcuffed, but most of them smiling bravely, too, and glad to be home.

There is one V.A.D. looking very slim in her blue serge uniform who works feverishly. She is returning with an empty when she meets the walking, comes coming out of their couch, some on crutches, some being helped by companions, arms in slings, bandaged faces, but all on their feet. She stops with a cry of gladness. "Jack, oh, Jack!" she cries, as a young man with his arm in a sling is passing. "Jack—it's Eva—don't you know me?"

She threw her arms around him. "It's my only brother—my only brother," she says to her companions who wait for her. "Jack, are you a hospital case, or can you come with me? I have a flat, I can put you up. All right, wait for me inside on the first bench—I'll be through in half an hour."

Jack sat on the bench inside watching the crowds endlessly milling around him. He was surprised to meet his sister here when he believed her to be safe in Winnipeg. He wondered what had brought her to London. Eva, the luxury-loving, indolent Eva. It was strange to see her in plain uniform, carrying stretchers. But there was a high look on her face that transformed her. She looked like the Eva he had known long ago.

Eva came for him at last and led him to the rear of the great station, where endless cars were parked, and put him into one which seemed very small and low.

"We pay a license according to wheel base, you know," she laughed; "and anyway, a car is a car, no matter how small it is. Oh, Jack, it's good to see you, and I have a bed ready for you. I've kept lots of the boys—I've been here six months."

Eva brought him to her flat in Maida Vale, and switched on a light, revealed a luxurious living-room, all in black and silver.

"Do you like it, Jack?" she asked with evident pride. "I work all day in misery and horrors so I have to have beauty at night."

A large black velvet divan, with round black cushions occupied one side of the room, the rug was black with a faint silver border—the fire-

place black and white tiles, and on the mantel were silver candlesticks and silver wrought image of the Madonna. On the black lacquered table stood a silver basket with American Beauty roses.

A slim maid appeared with coffee and sandwiches.

"We'll have a real meal later, Jack," said his sister. "And now tell me where you have been."

"First," said Jack, "tell me how you happened to come over?"

Eva laughed. "You will wonder, I know, but I couldn't stand it after the old crowd broke up—and I guess I missed Humphrey, too, though I won't admit it, because we had a row before he left, and he said things to me I shall never forget. But anyway, everyone was knitting and mending bandages, and I couldn't get into it. So I rented the house and I can live easily here on the money. I really like the work I am doing, and I love the boys—they are so brave. I bring them home with me sometimes and write their letters and listen to their stories. I have one little extra room, and really, Jack, I never was so happy in my life. Now tell me your story."

Jack told her of his capture, imprisonment, escape, his friend Arthur Warner and his sacrifice.

Eva's eyes were filled with tears as she listened. "Oh, Jack, wasn't he brave? But why did he do it? Why did he love you so?"

"It was not for me—it was his love for my wife!"

"Why, Jack, I didn't know you were married. Now begin at the beginning. Wait, do you want to go to bed first? You look pretty white. I must let you tell yourself. You see I am a pretty good nurse now, and I know how to take care of people."

"No, I am fine," said Jack; "my shoulder is nearly well again. I have had two months in the hospital with it, and I want to tell you all about it."

Jack began with his meeting with Helmi at Eagle Mines, their marriage by the magistrate; the magistrate's objections, and his showing of the newspaper report.

(To Be Continued.)

Countless tests and experiments, covering a period of over thirty years, prove that aluminum is the only completely satisfactory material in which to pack tea. Red Rose tea is put up only in aluminum, and a "money-back" guarantee goes with every package. 2W

Would Solve Anastasia Puzzle

Noted Historian Believes He Has Solution Of Controversy

Dr. Edward A. Walsh, S.J., vice-president of Georgetown University and a noted historian, believes he has in his possession a documentary solution to the Grand Duchess Anastasia controversy.

Whether it will uphold the woman now in the United States, under the protection of William B. Leeds, Jr., and known as Madame Tchaikovsky, as a true daughter of the late Czar Nicholas of Russia, or brand her as an impostor, Dr. Walsh will not speculate.

He is certain the mass of documents and records which he recently brought to this country from Europe, will settle, at least in his own mind—whether or not the Grand Duchess escaped the massacre of the Imperial Russian family 10 years ago.

For the past seven years, the Jesuit priest has been conducting a historian's investigation into the facts surrounding the deaths of Czar Nicholas and his immediate family. His studies have carried him to Russia, Belgium, France, Austria, Switzerland, England and Italy.

Manitoba Old Age Pensions

Pension Act Has Now Come Into Operation In Province

The Manitoba Government has by Order-in-Council brought into effect the Old Age Pension Act, passed at the last session of the provincial legislature. Beginning on September 1, pensioners whose applications have been approved by the Manitoba Workmen's Compensation Board will receive the stipulated pension of \$20 a month.

It is reported that 3,000 persons have already made application for a pension. Effort will be made to review these during the next month to determine the exact number eligible.

Under the terms of federal old age pension legislation half the cost will be borne by the Dominion Government, while the province will meet the remaining outlay. It is estimated that \$300,000 will be required for the initial year.

All persons who have attained 70 years and have resided in Canada for 20 years and five in Manitoba qualify for a pension.

Wrigley Marathon

Four Channel Swimmers Are In the Third Wrigley Swim

Among the three hundred odd entries received up-to-date by the Canadian National Exhibition for the Third Wrigley Marathon, which carries with it to the winner the world's longest distance swimming championship as well as a fair proportion of \$50,000, are four Channel conquerors.

When Gertrude Ederle set a new mark in 1924, Lord Riddell, owner of the "News of the World" made an offer of £1,000 to the first Britisher to beat her time—man or woman. Norman Derham, after three futile attempts accomplished this swimming the distance in 13 hours 55 minutes. He is an entrant this year and is now in training at Hanlan's Island. He is a very strong swimmer and is immune to cold water. Georges Michel holds the record for a quick Channel crossing. He is a Frenchman, took second to Vierkötter last year, and is again in Canada preparing for the hard fifty-mile grind. The distance this year is short for Michel, but he must nevertheless be considered a serious contender.

Millie Gade Corson, of New York City, was the first mother to swim the British Channel. She is one of the greatest women endurance swimmers in the world and will arrive in Toronto shortly to get accustomed to Lake Ontario.

Ernest Vierkötter, the winner of the Marathon last year, has at last completed intensive training and it is doubted by those who have seen him in action that he has improved his style and speed since annexing the premier prize last year.

The total entries now number considerably over 300.

Ancient Copper Mine

Remarkable Find Is Reported On Isle Royale In Michigan

An ancient copper mine, eighty feet long and hidden 30 feet or more beneath a ledge of copper-bearing rock, has been unearthed near Hay Bay on the southern edge of Isle Royale, by archaeologists exploring the island. Dr. George West, Milwaukee scientist, with the expedition, advanced the theory that some early tribe of Indians, perhaps a thousand years ago, dug from the copper veins for the tokens for lance heads, arrow points and ornaments.

Demand For Irrigated Land
Evidence of the demand for irrigated land in Southern Alberta is the fact that the Canadian Land and Irrigation Company find it necessary to open up another unit of the Vauxhall project to meet the demand, a step it was not planned to take until 1920.

Newsprint Production
Newsprint paper has formed over 80 per cent of the total production of Canadian paper-mills since 1917. In 1926 it was 83.4 per cent.

Relief From Asthma—Who can describe the complete relief from suffering which comes from the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence moves the lightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

How Fast a Bee Flies
An experiment was once made to see how fast a bee can fly. The hive was attached to the roof of a train, which attained a speed of 30 miles an hour before the bee was left behind.

It's pretty safe to judge bank cashiers by their disappearances.

Little Helps For This Week

"But let us, who are of the day, be faithful and love; and for an helmet, the hope of salvation."—1 Thessalonians V. 8.

I wake this morn, and all my life Is freshly mine to live; The future weaves a promise rife, And crowns of joy to give.

New words to speak, new thoughts to hear.

New love to give and take; Perchance new burdens I may bear For love's own sweetest sake;

Every day that is born into the world comes like a burst of music, and rings itself all the day through; and thou shalt make of it a dance, a dirge, or a life march as thou wilt.

—Thomas Carlyle.

Minard's Liniment For Blistered Feet.

Prosperous Indication
Federal Government Will Meet Maturing Loans By Paying In Cash

An indication of the present sound condition of financial conditions in Canada is given in the announcement that the Canadian Government Department of Finance will not find it necessary next October to do any special financing or refunding to meet maturing loans. When Government loans to the amount of \$53,000,000 fall due in October of this year they will be paid off in cash. In recent years it has been customary to take care of loans when maturing by a refunding process.

Nearly 6,000,000 bicycle riders are in the British Isles this season.

The "military pace" is reckoned at two feet six inches.

The Columbia Ice Field

New Inclusion In Extension Made To Jasper National Park

The extension of 980 square miles made to Jasper National Park, Alberta, in 1927, brought the Columbus Icefield within national park boundaries. This giant icefield, one hundred and twenty-five miles in extent, which is the mother of more than a score of glaciers, is surrounded by a galaxy of giant peaks and represents the very climax of the scenic and alpine features of the Rockies.

SUMMER COMPLAINTS

KILL LITTLE ONES

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly.

Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet "Care of the Baby in Health and Sickness" will be sent free to any mother on request.

Declining Birth Rate In Italy
Despite the tax on bachelors, prizes for large families and press campaigns for increasing the population, the birth-rate in Italy is steadily declining. If it were not for the profligence of the south the situation would be very grave. The Popolo d'Italia gives figures for many big towns, from which it would appear that in all of them deaths exceed births.

Relief From Asthma—Who can describe the complete relief from suffering which comes from the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence moves the lightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

THE INCISORS

You are very particular to keep these eight front teeth (four upper and four lower), white and sound, so their function, then to you, would seem largely esthetical. But they have another use from which they take their name—that is to incise, or cut.

In your child you have seen them erupt with three distinct tips or tubercles, which by and by have worn down to leave a straight cutting edge.

This nothing is a purely normal development, being due to the calcification of the enamel covering from three separate centres. Now, you have noticed too, with perhaps no little concern, that upon eruption, the two upper front teeth (central incisors) seemed quite out of proportion to the size of the face, giving them an ungainly appearance.

But you must remember this—that while the face will grow larger, the teeth will not increase in size—so Nature has planned with foresight as you might have guessed.

Now try this; consult a mirror, and note the shape of your face. To which of the three types does it incline, tapering, oval or square? Then study the form of your upper central incisors, imagine it inverted and observe that it conforms to the shape of your face. Nature is very attentive to details, ever striving for harmony. Remember then, that you must give redoubled zeal to the care of these incisors, which are not merely useful, but are an asset to your appearance, if rightly cared for.

Miller's Worm Powders were devised to promptly remove the dread of worms which suffer from the ravages of worms. It is a simple preparation to destroy and expel the irritating worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

STOP YOUR CRYN'
Stop your cryin'! Don't you know
You can't keep a-yellin' so?
Drive your Mammy almos' mad;
Cheer up honey do be glad.
Let me dry those tears away.
You're just one year old today!
See here, when you gwine to quit?
Look out, or that face'll split!
Times has come for you to stop.
Or I'll have to call your Pop.
Gwine to spoil that angel face!
N make your Mammy fall from grace
Lawdy! Gwine to cry some more?
Liza, you just shut that door,
Scare the neighbors half to death.

Goodness me, you're out of breath.
Ain't you got no sense at all?
You are certain full of haw!
Mammy's rosebud' now be calm.
Put your head on muddie's arm
Look out for the bogie men,
Dancin' with the old black hen.
Let me dry those little eyes;
Get you gone, you naughty cries!
Angels rockin' lamb to sleep,
Jonah's whale is swimmin' deep,
Old Jack mule ain't got no hay,
Have to eat some other day.
Fairies on your eyelids creep—
Thank the goodness, he's asleep!
William Thompson.

Main Street

Miss Tena Schonert left Thursday for Wheaton College, Illinois after spending a week with Mrs. H. Schonert.

Mr. and Mrs. W. J. Cole returned Tuesday after visiting their home-stead at Weskatenau.

Mr. and Mrs. J. S. Reeds returned Sunday after a very pleasant motor trip to the coast.

Mrs. M. L. Wright expects to return home Saturday after a ten days visit in the city.

Mr. Wm. Masson is distributing the prize cheques to those who have won prizes at the Irma fair.

Mr. C. T. Schon, of Brooks, Alta, returned home Thursday after spending a week with his brother Mr. L. A. Schon, at Irma.

The C. N. R. are having the approach to the local elevators graded and leveled up before the fall rush of grain starts.

Mr. and Mrs. Thornley Elford intend leaving for Vancouver where they will make their future home about the end of the week.

Threshing started in the Irma district last Wednesday when Gordon Ambler started threshing an eighty acre field of Garnet wheat for Mr. A. G. Walker, north east of Irma. The wheat averaged around 30 bushels per acre and graded two straight a few loads grading No. 1.

Mr. R. Rowe, of England, started home Wednesday night after spending six weeks with his daughter Mrs. W. Burton. Mr. Rowe is 81 years old but had enjoyed his visit to Alberta immensely and will have some good reports about the possibilities of Alberta to take back to his native land.

LOOK—A 12-20 engine and 22-36 separator ready to go out and thresh. For sale by McDowell. This is a Rumely outfit and can be purchased cheap, terms if you want them.

SEE PROSPERITY FOR FOX FARMS

Natural Resources: During the

last two years there has been an increase of over 50 per cent. in the price of silver fox furs in spite of the fact that over sixty thousand pelts, from foxes raised in captivity, have been placed upon the market this season; and there is every reason to believe that silver fox furs are a staple commodity for which there will be a steady and increasing demand. The idea appears to have existed in the minds of the public and of some fox breeders as well, that silver fox furs have been prized and, therefore, commanded high prices, because of their rarity, and that silver fox ranching was a mere bubble that would burst when these pelts were produced in large quantities.

Numerous fox breeders held the idea that the chief hope of making money was by the sale of live foxes and that it behooved them to reap the harvest as quickly as possible. This mistaken view has done great mischief to silver fox ranching, as breeders are now beginning to realize.

An analysis of the situation as a whole indicates that silver fox ranching is a well established industry, producing a commodity for which there will be a steady and increasing demand, and, while unfortunately there are some who are exploiting the industry and straining its possibilities, the more intelligent fox breeders are making determined efforts to build up silver fox ranching along the well recognized lines that have led to success in other industries. The National Fox Breeder's Association of Canada, in co-operation with the department of agriculture, has already established a rigid and efficient system of registration of pedigreed silver foxes in order to improve the standard of the animals, and also a system of marketing of pelts to prevent undue sacrifices that previously were a cause of great loss of revenue to the industry.

Silver fox ranching presents great financial possibilities. The cost of feed and labour, and the capital expenditure, are much less than in other livestock industries. The average cost of the unprepared feed at the experimental fox ranch of the department of agriculture at Summerside, P. E. I., for an adult fox per year has been about \$15, and for the feed required to raise a pup from birth to maturity about \$10. A well equipped pen for one pair of foxes need not cost over \$100. One hundred silver foxes can readily be ranching on ten acres of land and do not require the attention of more than two men. So that even if the price of silver fox furs dropped to near the level of wild caught red fox pelts, which is extremely improbable, there would still be a good margin of profit from silver fox ranching carried on along sound economic lines.

Here and There

(107)
Quebec, Quebec.—The most successful meeting of the Canadian Seed Growers Association, closed at the Chateau Frontenac on Saturday, June 16th, with a record demand for registered seed for all Canada, given as follows: Wheat, 77,919 bushels; oats, 56,815 bushels; barley, 16,637 bushels; and alfalfa, 10,748 bushels.

Montreal, Quebec.—Fur prices have advanced since the early spring, as reflected in the three-day fur auction sale recently concluded here. Nearly 60,000 ermine pelts sold at 20 per cent above the level of the previous sale, with a top price of \$3.80; mink was also up 20 per cent, with the highest sale at \$46.50, while wolf pelts brought a ten per cent advance over the price level of early spring.

Canadian dinners in the Old Country are not considered complete without Canadian ice cream for dessert. Thus, for the High Commissioner's annual dinner in London on July 20 two eight-ounce tubs of the delicacy were ordered and these were delivered by Canadian Pacific Express in ample time for the dinner. The same thing was done last October for a special Canadian dinner held at Manchester by the Canadian Trade Commissioner there.

Ottawa, Ontario.—By the end of the season 15 flying clubs will have been established throughout Canada, according to advices from the Air Board. A total of \$175,000 is being spent by the board this year in the promotion of these clubs for civilian flying. Clubs have already been established at Montreal, Toronto, Ottawa, Hamilton, Halifax, Saskatoon, Regina, Moose Jaw, Edmonton, Victoria and Granby. One at Halifax and another at London are about to enter the list.

Transportation of small but valuable packages by air from Canadian Pacific liners at Rimouski to Montreal and Toronto, thereby saving about 24 hours in time to becoming increasingly popular. After Montreal, Toronto, London and Chatham, Guelph had its turn with a parcel of Irish linens going to a department store there and the shipment being welcomed by Mayor Robson and other prominent citizens of the town. These parcels are handled by the Canadian Pacific Express Company.

A tablet in memory of men of the Seventh Royal Fusiliers who served with the Quebec garrison during the siege of 1775-76 by the Americans under Montigny and Arnold, was unveiled on Dominion Day on the Wall of the Chateau Frontenac by His Excellency, the Governor General. Present at the ceremony were officers of the Fusiliers from England and a detachment from the Canadian Fusiliers of London, Ontario, who are affiliated with the English corps. The Chateau Frontenac occupies the site of the Chateau St. Louis which was the military headquarters during the siege.

Inspection of the "Duchess of Bedford," new 20,000-ton Canadian Pacific liner, which recently made her maiden trip to Montreal, at once disclosed the extreme suitability of these "Duchess" ships for tropical travel. Ventilated under the Bill-Louise system of individual controlled outlets, cool air is forced under gentle pressure to every part of the vessel. Broad sun-decks and an open-air swimming pool add to the luxurious appearance of the ship and it has now been decided that the "Duchess of Athol" should be used on the South Africa route next year.
